Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of Reply filed on January 16, 2003. Claims 1-59 are pending. Claim rejections under 35 U.S.C. § 112, 102, and 103 are maintained for the reasons of record as indicated in the previous Office action dated October 22, 2002.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, 10, 12, 13, 16, 17, and 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "hydrocarbon-based radical" is used by the claims to mean alkyl chains which may be optionally contain heteroatoms. Examiner finds the argument filed on January 16, 2003 unpersuasive, and reiterates that the term "hydrocarbon" strictly means only hydrogen and carbon by definition well known to a skilled artisan.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Yu (US 5886041).

Art Unit: 1617

The rejection is maintained for the reasons of record as indicated in the previous Office action dated October 22, 2002.

Applicants argue that none of Examples 6, 15, or 18 in the reference provide the claimed method of treating skin conditions with compositions containing polyamino acid derivatives. The argument is unpersuasive, since the Yu invention as whole is directed to treating skin conditions such as acne by topically applying the composition in the Examples, which include glycine-glycine. The claimed method is thus anticipated by the reference. Although examiner concedes to the extent that no beta-alanine-L-histadine is disclosed in the reference, the rejection is still proper as the instant claims are met by the topical compositions comprising glycine-glycine, a dipeptide.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yu (US 5886041).

Rejection is maintained for the reasons of record as indicated in the previous Office action dated October 22, 2002.

Applicants argue that the rejection is based on selecting polyamino acids from among numerous amphoteric compounds disclosed in the reference, and provides no particular teaching or suggestion to select these acids over other compounds. In response, examiner reiterates that the scope of the formula (I) encompasses any amino acid. As stated in the previous Office action, the motivation to use a variety of

Art Unit: 1617

dipeptides, tripeptides, and short-chain polypeptides stems from the teaching in the Yu reference that these are effective to treat the disclosed skin conditions.

Response to Arguments

Applicant's arguments with respect to claims 1-30 have been considered but are not persuasive. See above rejections for examiner's answers to the arguments.

Conclusion

No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
